## FAQ regarding the stand:

### Can I attach something to the walls?:

If you need to attach something to the wall, ensure that **no damage** is caused. **Drilling or similar methods are not permitted.** Additionally, make sure no adhesive residue is left behind. For example, double-sided tape can leave residue, so it's recommended to first apply **paper tape** and then place the double-sided tape on top. The best option, however, is to use **professional branding stickers**, which do not leave any residue. If you need to attach a heavier item, consider whether the tape can support the weight. Otherwise, it may be better to place the item against the wall or use alternatives like **banners, a monitor or a mini beamer/ projector.**

Kindly ensure that you bring all necessary materials for a proper stand setup without causing any damage. Please note that any damage incurred will obligate us to issue an invoice to the responsible company.

### Example of materials which can be used:

***Wishing you success with the fair preparations!
